EDUCATION

Veermata Jijabai Technological Institute

August 2018 - July 2022

In Progress

Bachelor in Technology (B.Tech.)

Electronics and Telecommunication Engineering

INTERNSHIP EXPERIENCE

JPMorgan Chase & Co.

May 2021 - July 2021

Software Developer Intern

Designed and developed an **interactive dashboard** to keep track of various bugs.

The application used **Springboot** for its backend and **React** with **Material UI** for the frontend.

App for Mumbai Vikas Samiti

November 2020 - January 2021

Software developer

Helped in creating the GUI and connecting it with the backend of a mobile application which would alert users based on their locality on when will the Garbage truck come.

The UI had to be very simple and light as it shall be used by people who don't have much technical knowledge and phones which have low processors.

The project is currently in testing phase which had to be delayed due to covid-19.

Typed Tales

August - September 2020

Software Developer

Helped in developing the web application for disabled people which was released after the completion.

The product release was a success and was used by **20 people** during the launch and was received by positive feedback.

[**Typed Tales**]

PROJECTS

Thinkbrew

Aug 2021 - Present

Personal

Thinkbrew is a **privacy focused self hosted blog** which provide articles related to finance, health, technology and various other topics. Currently having 10+ members who receive weekly emails.

[**Website**]

IRI

Dec 2020 - Present

Personal

IRI is a virtual assistant capable of conversation, following basic commands and sending emails. The project was made using **Python** and had **Speech Recognition** google APIs.
[Source Code]

HACKATHONS

Code for Good

Aug 2020

JP Morgan

Implemented a web app for Sight and Life NGO to help manage supply and demand of distribution of eggs around the world.

Created a ML model using **LSTM** to predict future demands and supplies with **68% accuracy** and created graphs for such in span of 12 hours.

Secured **4th position** out of 7 teams of similar problem statement.

Smart India Hackathon

Dec 2019

MHRD

Developed an application to **identify sexual Predator** with **72%** accuracy.

Used **linear regression** to create the ML model along with **Django** for the frontend".

Secured **17th position** out of 30 teams.

POSITION OF RESPONSIBILITY

Inheritance Mentor

June 2020 - July 2020

Community of Coder's

Inheritance is a yearly event with duration of in which 2nd year students help their juniors in learning and developing applications on different domains. I mentored 4 teams who worked on different frameworks which included **Django**, **Android Applications** and **React**

Community of Coder's Core Member

June 2020 - July 2020

Community of Coder's

Community of Coder's is a group which helps college student's in learning and exploring different fields in software developing and passing it down to juniors.

We also hold various workshops, competition's and hackathons for our juniors to help them develop and enjoy the field in which they wish to work upon.

Robomaze Team Leader

October 2019 - December 2019

Technovanza

Technovanza is a early event of VJTI. In this I managed the Robomaze event which helped me to adept at setting the right expectations, meeting deadlines, handling multiple stakeholders, and working in synergy with a team.

TECHNICAL STRENGTHS

Web

ReactJS, Redux, Node.js, MongoDB, Firebase, Springboot

Programming languages

JavaScript, Python, Java, LaTeX, C++, Bash

Operating Systems

Linux, Mac & Windows

Software & tools

NodeJS, PostgreSQL, VS Code, JetBrains IDEs, Postman, Jupyter, Docker, Git, Linux shell utilities
Vim, Pandas, NumPy, Matplotlib

EXTRA CURRICULAR

Worked as an online listener on 7 cups **helping 800+** people with different issues such as anxiety, depression, bullying, etc and improved their mood.

Represented college and school in various **chess competition's**.

Class Representative and **Director Coordinator** of Entrepreneurship Cell in first year
